

At Prahran Market Clinic we are committed to providing a cost effective health service to our community. Unfortunately due to the increase in the cost of providing services we must increase our out of pocket charges by a small amount. This has in part been forced on the Practice because of the on-going freeze on the Medicare rebate. We have held our fees at their current level for the past three years despite the freeze and increasing costs. If you fee strongly that the Medicare freeze should be lifted, please contact your local Member.

The increases will take effect on April 1st 2018 and will be;

Level A consult - \$2

Level B consult - \$3

Level C consult - \$5

Level D consult - \$8

Rapid Test - \$5

Script fee - \$2

Thank you for your understanding.
